## CONTROL AND PREVENTION OF INFECTIOUS DISEASE

### IMMUNISATION

During 1959 ninety nine children under the age of five years received their primary immunisation against diphtheria. Forty six older children received further injections to maintain their immunity.

Satisfactory progress continued to be made with poliomyelitis vaccination of young children.

BCG vaccination of children of school leaving age was continued. 23 boys and 26 girls accepted it.

### TUBERCULOSIS

There was one death recorded as due to this disease.

Three new cases of pulmonary tuberculosis were notified.

The cases known to be living within the district at the close of the year are as follows:-

	<u>Male.</u>	<u>Female.</u>	<u>Total.</u>
Pulmonary Tuberculosis .....	16	22	38
Non-Pulmonary Tuberculosis .....	6	4	10
Totals .....	22	26	48

### OTHER NOTIFIABLE DISEASE

The following cases of infectious disease were notified:-

Measles .....	19
Whooping cough .....	19
Acute Pneumonia .....	1
Scarlet Fever .....	2

### NATIONAL ASSISTANCE ACTS

In one case it was necessary to apply to the Court for an Order to remove an aged man to hospital. The man had been visited regularly by me over a period of twenty months and not until it was evident that removal to hospital had become essential was formal action taken.

## SANITARY CIRCUMSTANCES OF THE AREA

For the following information I am indebted to Mr. R. W. Turner, Chief Public Health Inspector, whose work during the year under review it represents.

### WATER SUPPLY

Main water supplies from the Leicester Corporation, Market Harborough U.D.C., and the Mid Northants Water Board remained consistently good. Restrictions were imposed on consumption during parts of the summer months. Shortages in Stonton Wyville and Medbourne were dealt with by carting water whilst in Hallaton, Slawston and Glooston temporary standpipes were set up.

The only parishes not now served by water mains are Stockerston, Horninghold, Holt, Welham and Stonton Wyville and next year should see the situation largely remedied.

2617 dwelling houses now have an internal supply serving a population of 8286. 153 houses have external standpipes, whilst 498 houses still rely on wells and expose a population of 1276 to some risk.

41 samples of mains water which were taken during the year were in connection with tests on new mains.

86 samples of well water were taken. All but two proved unfit for domestic use.

### SEWAGE DISPOSAL

The District is served by 72 privies, 174 pail closets and 3356 water closets, the latter discharging to some 18 publicly owned sewage works, 11 sewer dykes, one private system and in one case direct into a watercourse. In addition there are some 224 cesspools.

The work on the Thorpe Langton disposal scheme commenced in December, 1959 and the Husbands Bosworth scheme will follow on from this. The Mowsley-Laughton scheme is approved whilst the Bringhurst, Drayton and Great Easton scheme has been the subject of a Ministerial Inquiry.

The control of works by systematic analyses of effluents was continued and 58 samples of effluent were examined from Kibworth, Husbands Bosworth, East Langton, Medbourne, Saddington and Mowsley.

### PUBLIC CLEANSING

House refuse is collected at fortnightly intervals by direct labour and disposed of by crude tipping at Foxton, Husbands Bosworth, Hallaton and Kibworth.
